Introduction

The structure of this report was built by the Explorator component of ARG, which explored the following directory:
`/builds/AutomaticReportGenerator/arg/tests/build_tests/crush/data`
and discovered the following relevant data:

- ExodusII mesh in `crush_assembly.g`

Chapter 1

Geometry

This chapter describes the geometry as specified in the parameters file.
The term Electronic Product Definition (EPD) is also often used to denote the CAD geometry of the case.

1.1 Geometry Files

This section provides an overview of the geometry files found in:
`/builds/AutomaticReportGenerator/arg/tests/build_tests/crush/data/Interface`
We note that this is a particular case with a bijection between CAD and FEM items.

Chapter 2

ExodusII Mesh

This chapter describes the ExodusII mesh in:
`/builds/AutomaticReportGenerator/arg/tests/build_tests/crush/data/crush_assembly.g`

2.1 Overview

This section provides an overview of the meta-data and global properties of this ExodusII mesh.

item	number
Exodus II files	1
